

Guest Lecture on Six Sigma

By Mr. Gaurav Varma,
Assistant General Manager, Marketing & Sales,
Academy International Pvt Ltd

On 19th September 2017

Learn with fun! The session started with a boost, we learnt sign language from A-Z and it was a fun activity. In a gist we got a glimpse of XLNC as an e-learning instructor led virtual training classroom, and the course that they offered was of six sigma. Lean six sigma is a process improvement methodology that teaches one how to eliminate waste. It is a generic course where in people in every field can look forward for. The ability to add six sigma certification to resume proves ones commitment to improving business acumen and analytical skills, as well as improving the business in overall. The principles of six sigma find applications in countless organizations across a wide range of industries worldwide. The benefits of six sigma are as follows:

1. This certification course would help eliminate errors.
2. Improve business processes and sustain quality improvement.
3. Application across industries.
4. Helps nurturing managerial and leadership ability.
5. An experience in Quality Management

The session ended with students registering for the course that is offered in the college, and many of us was positively motivated towards it. Lastly thanking our college and all the faculty for arranging extra certification courses for our career enhancement.

Resource Person,
Mrs. Puja Patil,
